Career Objective

Computer Science undergraduate with strong foundations in programming, software development, AI/ML fundamentals, and data processing. Hands-on experience building full-stack applications, REST APIs, database-driven systems, and machine learning workflows. Interested in applying AI, automation, and problem-solving skills to build intelligent software solutions and rapidly prototype AI-driven applications. Quick learner with a strong interest in LLMs, AI agents, and emerging AI development technologies.

Technical Skills

Languages: C++, C, Java, Python, JavaScript, SQL

Technologies: Spring Boot, Spring Data JPA, Hibernate, Spring Security, React.js, REST APIs

Database: MySQL

Tools & Platforms: Git, GitHub, Docker, Oracle Cloud Infrastructure

AI Interests: LLMs, Prompt Engineering, AI Agents, RAG, Agentic Workflows, AI Automation

Concepts: Data Structures & Algorithms, Object-Oriented Programming, Operating Systems, Database Management Systems, Data Privacy & Security

Projects

HostelHub – Full-Stack Hostel Management & Booking Platform *Java, Spring Boot, Spring Security, JWT, Hibernate/JPA, MySQL, React.js, REST APIs*

- Developed a full-stack student accommodation platform using React.js, Spring Boot, and MySQL, enabling students to discover hostels, view availability, and create bookings while allowing landlords to manage hostels and rooms.
- Implemented secure authentication and role-based access control using Spring Security and JWT, supporting separate Student, Landlord, and Admin workflows, including hostel approval/rejection and administrative management.
- Deployed the application using GitHub and Render with a cloud-hosted MySQL database.

Retail Sales Data Engineering Pipeline *Python, Pandas, PySpark, MySQL, Power BI, Docker*

- Developed an end-to-end data engineering pipeline using Python and PySpark to ingest, clean, transform, validate, and process retail sales data.
- Used SQL and MySQL to store and query processed sales data, enabling efficient analysis of transaction and business metrics.
- Built interactive Power BI dashboards to identify sales trends and patterns and generate actionable insights for business decision-making.

Experience

AI-ML Virtual Internship – AICTE EduSkills 2024

- Gained hands-on exposure to machine learning workflows, data preprocessing, feature engineering, and model evaluation through practical exercises.
- Applied fundamental AI/ML concepts to understand data-driven problem solving and the development and evaluation of machine learning solutions.

Education

Koneru Lakshmaiah Education Foundation, Andhra Pradesh B.Tech, Computer Science and Engineering
CGPA: 9.02 / 10.0

Certifications

- Oracle Cloud Infrastructure Foundations Associate
- Microsoft Certified: GitHub Actions
